

# How correct create the price-list for upload to E market

1 Open base en.xls, if you have MS Office or if you have Open Office base en.ods and on base to create the price-list.

## Hints:

- a) Set to auto fit height cell;
- b) Start the creation of the price-list;
- \* Order of the columns can't change;
- \* The line № 1 must be of example only. The Price-list must start the line only.;
- \* instead of row 2 are making own information;
- \* you can do any quantity rows with you products;

Products			
1	Products	Price	Unit of measuring
2	Here the name of the product + name of your company	Price to + currency	Price per unit
3			
4			

- c) The information for the one kind of the productions must locate only it line. The Description of the product on other line is inadmissibly;
- e) The clear line is the finish price, for one kind of goods must fill in everything cells;
- f) The cost divides only point **12.97 euro**
- g) In the cost need indicate the currency name (**USD, EURO, RUR**)

Products	Price	Unit of measuring
the product + name of your company	Price to + currency	Price per unit
	45 euro	

Not maintain of the rules give the error in uploaded your price-list to the data base.
